1.Remarks:

- 1.1 Technical drawings of air restrictors for NA cars are registered with FIA. Only restrictors in compliance with this registration are allowed
- 1.2 Use of catalytic converter compulsory
- 1.3 Notes on boost control:
 - Values are boost pressure ratio and need to be multiplicated by the ambient pressure to get the Pboost limit.
 - Competitors must adjust boost pressure relative to ambient pressure at each event
 - Phoost limits linear interpolation approach
 - Control of Phoost strategy see further.
- 1.4 The SRO GT Bureau is allowed to modify any parameter required to establish the balance of performance cfr the current Regulations.
- 1.5 Cfr the current Regulations: Engine reference data (iA, Lambda, Fuel inj, Cam In/Out, airbox pressure drop, etc) is the one collected during BOP tests and will be used for checks.
- 1.6 BMW (GT3-053) M4 GT3 Engine settings as during Official Test @ Oschersleben 2023 and datasheet date 220404 98
