

BALANCE OF PERFORMANCE FOR C TRACKS

BALANCE OF PERFORMANCE FOR C Tracks:

SACHSENRING

These balance of performance measures are the result of the tests, research, analysis and projections performed by SRO Ltd and are the sole property of SRO Ltd. Other series promoters, race organisers and national sporting authorities cannot use all or part of them without SRO Ltd's prior written consent. Any contravention will result in a legal action.

FIA GT3 2018 Specification

Make	FIA GT3 Homologation	Model	Min Weight kg	BOP Ballast kg	Final Weight kg *without driver weight	FIA Restrictor Size mm	RH Front Min mm	RH Rear Min mm	Refueling Rig restrictor mm	Comments
BMW	GT3-043	M6 GT3	1290	+25	1315	none	93	93		Max Boost P ratio limit see table
Ferrari	GT3-044	488 GT3	1260	+35	1295	none	73	98		Max Boost P ratio limit see table
Porsche	GT3-041	991 GT3-R	1225	+30	1255	2 x 41,5	72	124		

- 1.1 Additional weight must be installed in accordance with article 257A-4.3 2018
- 1.2 Technical drawings of air restrictors for 2013/2014/2015/2016/2017/2018 cars are registered with FIA. Only restrictors in compliance with this registration are allowed
- 1.3 Use of catalytic converter compulsory
- 1.4 Notes on boost control:
 - Values are boost pressure ratio and need to be multiplicated by the ambient pressure to get the Pboost limit.
 - Competitors must adjust boost pressure relative to ambient pressure at each event
 - Control of Phoost is FIA GT3 Phoost strategy
 - Phoost limits linear interpolation approach
- 1.5 The SRO Sporting Board is allowed to modify any parameter required to establish the balance of performance.
- 1.6 Engine reference data (iA, Lambda, Fuel inj, Cam In/Out, airbox pressure) is the one collected during BOP tests and will be used for checks. If noted differently in comments the (e.g. iA, Lambda, Fuel inj, Cam In/Out, airbox pressure) is set as reference.
